

David Trubridge

lighting

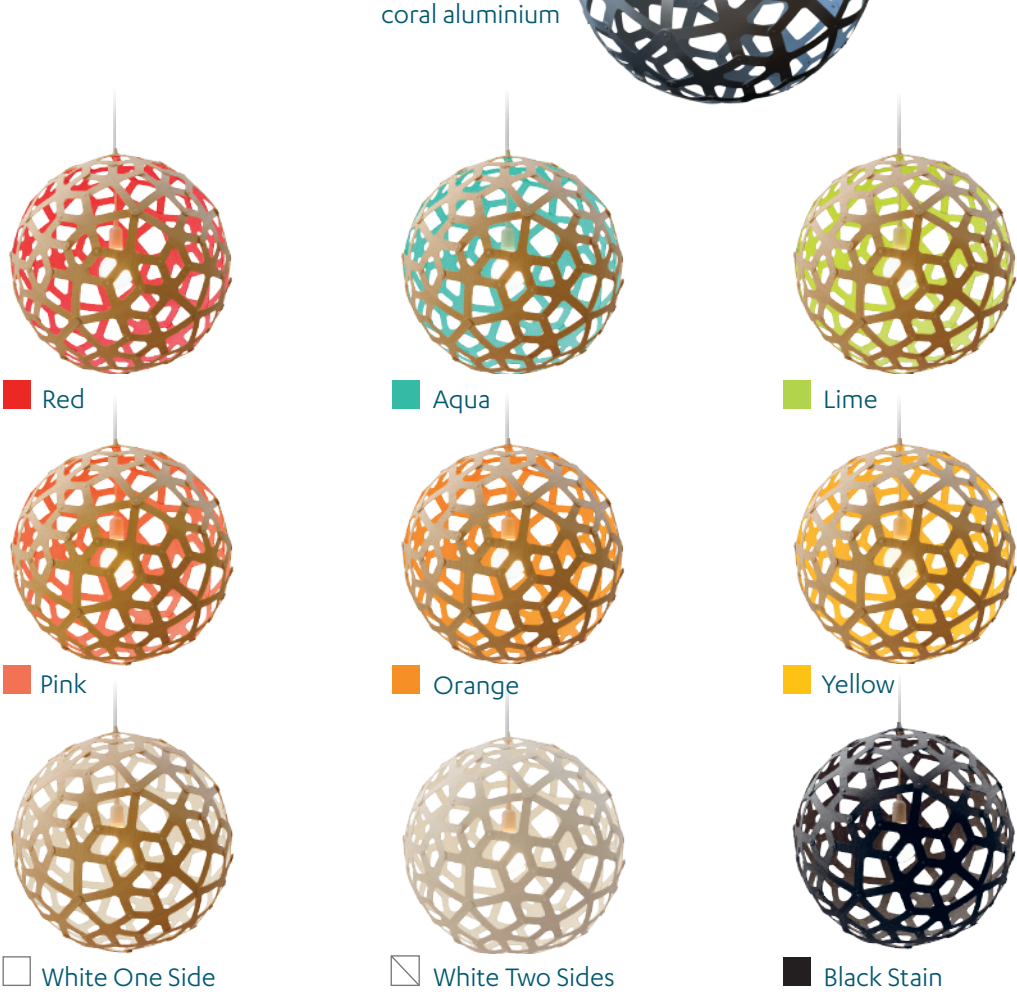

from new zealand, aotearoa, in the south pacific, wild nature combines with artistry and design in the work of david trubridge

coral & floral

kitset pendant light
bamboo plywood
plastic clips
aluminum option: (suitable for
outdoor use with damp location
electrics)

400mm dia (16" dia)
600mm dia (24" dia)
800mm dia (31" dia)
1000mm dia (39" dia)
1700mm dia (67" dia) (hoop pine,
riveted assembly)

Staining and Painting:

All kitset plywood lights in this catalogue (excluding Sola, Ulu and Traces) are available in 6 stock colours painted on one side, or white painted on one or two sides. Staining and custom colours also available by request at extra cost. Coral or Floral 600, 800 and 1000 are also available in aluminium - assembled only (suitable for outdoor use with damp location electrics).

Note: All lights other than aluminium are intended for dry interior use only and come with electrics and separate suspension wires where applicable (this excludes Traces and Sand Shade).

plastic clips

(69" h x 16" dia) 1750 h x 400 dia
(32" h x 16" dia) 820 h x 400 dia

Seed System:

We are constantly improving our design and manufacturing process to minimise our environmental footprint. Seed System designs are on average 1/40th of the volume of the same assembled light. Seed System designs are only made possible through your involvement as you 'grow' your kitset into a lightshade. Together we have helped to minimize the effects of shipping, to reduce the number of trucks on the road and decrease the design's environmental footprint.

When this logo features alongside the name of one of our lights, it indicates the design falls under the Seed System family. It is delivered to you in kitset form with easy to follow assembly instructions.
